ABSTRACT:

PROBLEM TO BE SOLVED: To enable a user to select the presence/absence of the release of a paper receipt and the presence/absence of the transmission to the user terminal of transacting contents, etc., in an automatic teller machine capable of bank job services of depositing of cash, drawing of cash, etc.

SOLUTION: The display/input control part 58 of the automatic teller machine 16 connected with a host computer 132 through a communication line 14 displays a picture for inputting the transmitting destination electronic mail address of a transaction history on a display 46. When the transmitting destination electronic mail address of the transaction history is inputted by an input part 48, a picture for selecting whether or not to transmit the transaction history is displayed and a picture for selecting whether or not to release the transaction history as a paper receipt is displayed.
